

# Certified Information Security Manager (CISM)

Get ready for the CISM certification with interactive instructor-led training sessions

Prepare for success in becoming a Certified Information Security Manager with our engaging, hands-on CISM training. In partnership with ISACA, this interactive course is designed for professionals, who want to strengthen their expertise in the four critical domains of information security management, providing a solid foundation for anyone considering CISM certification.

The Certified Information Security Manager (CISM) is an industry-recognized certification focused on governance, incident response, and risk management, preparing professionals to lead security programs more effectively.

## The program

The CISM course consists of onsite instructor-led training across four full-course days. Through interactive group- and individual exercises, participants are introduced to the CISM curriculum, covering four domains of information security management in detail:

1. Information Security Governance
2. Information Security Risk Management
3. Information Security Program Development
4. Information Security Incident Management

## Instructor

Training is led by Klaus Kongsted, one of Denmark's leading information security experts and co-founder of the cybersecurity service company Dubex. Klaus Kongsted brings demonstrated experience in Governance, Risk and Compliance, GDPR, Cybersecurity, and Management.

## Practical

**Date:** 2. & 3. 9. & 10 September 2025

**Time:** 08.30-17.30

**Location:** Glentevej 69, 2400 København

**Price:** 29.995 DKK ex. VAT and ex. exam fee.

## Included in program
